

EXAD

EXPERT'S ADVICE & DESIGNING

Precision in Engineering | Excellence in Design | Quality in Delivery

Vision

To connect with global clients by delivering on-time, high-quality, and cost-effective CAD and data solutions, fostering long-term partnerships built on trust and excellence.

Mission

To drive our clients' success by providing world-class CAD drafting and data management services, ensuring precision, customer satisfaction, and profitability in every project we undertake.

We have a passion for excellence. We have the agility to adapt to technology and change. Our collaborative environment fosters teamwork. And we build trust through honesty and transparency.

Our Core Principles

Commitment to Excellence

We take great pride in our dedication to excellence. It is at the heart of everything we do.

Driven by Agility

We stay ahead by embracing cutting-edge technology and adapting through agile transformations.

Unyielding Reliability

Our workflows are a testament to our consistent and dependable performance.

Power of Teamwork

We provide a supportive environment where our teams can collaborate effectively to achieve outstanding results.

Built on Honesty

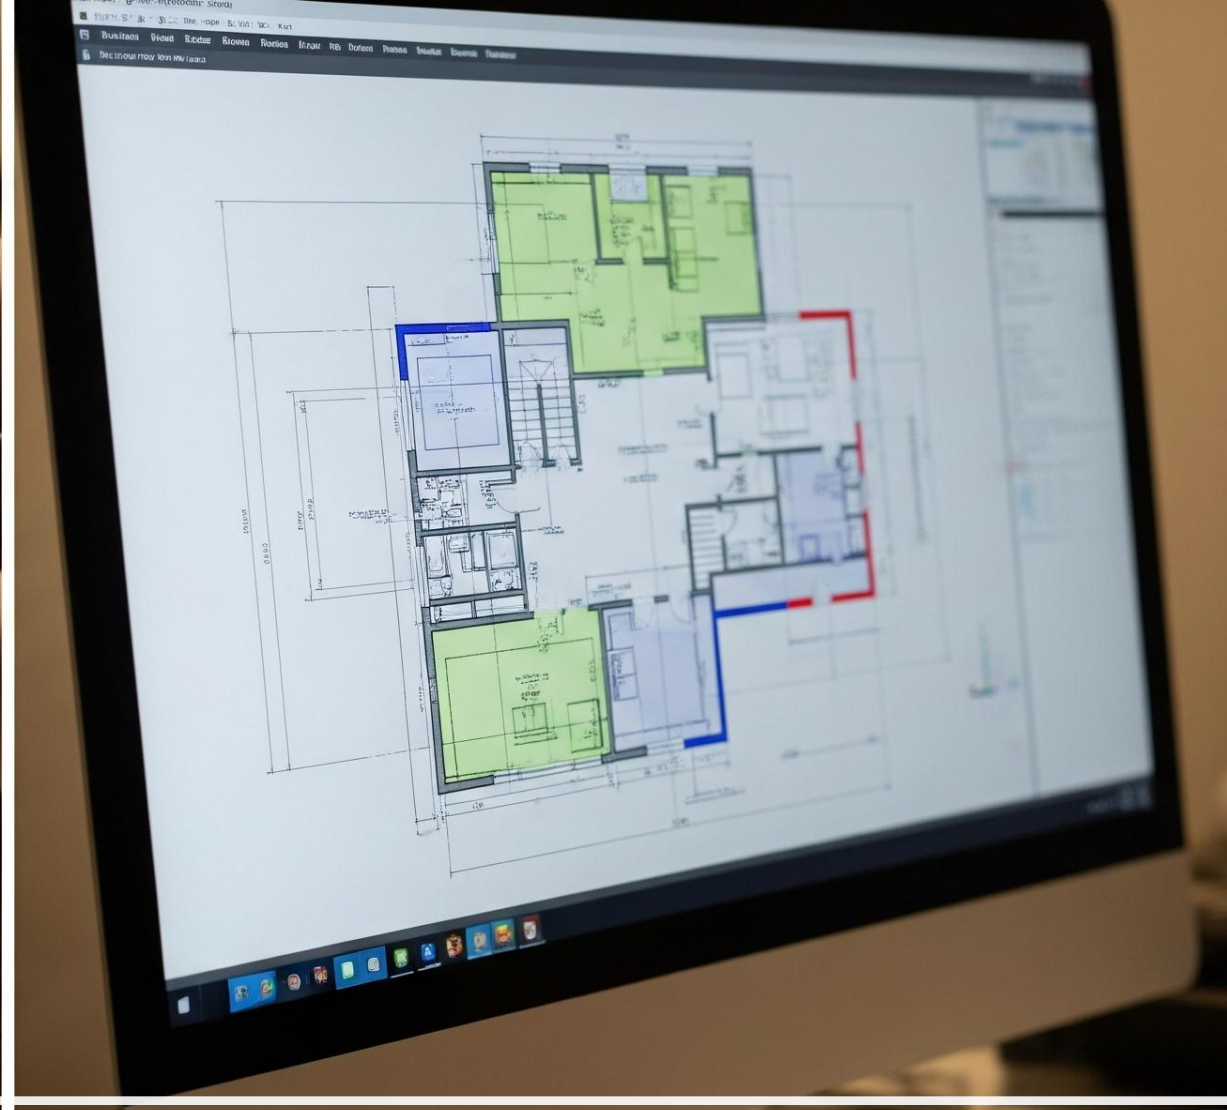

We earn the trust of our clients and partners through integrity, transparency, and straightforward communication.

Technical Edge

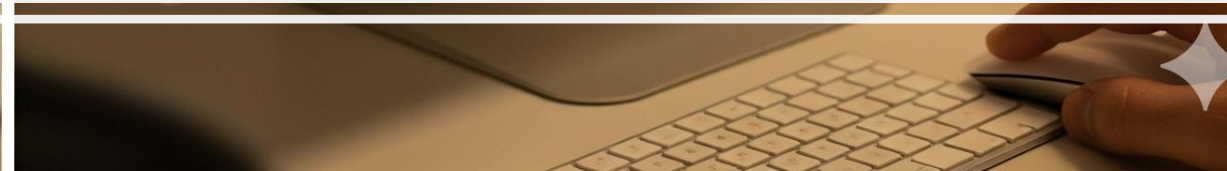

We deliver innovative and cost-effective solutions efficiently, passing on productivity gains directly to our clients. Our team utilizes cutting-edge technology and is adept at working across diverse CAD software platforms. We are also fully equipped to seamlessly integrate with our clients' existing software environments and systems.

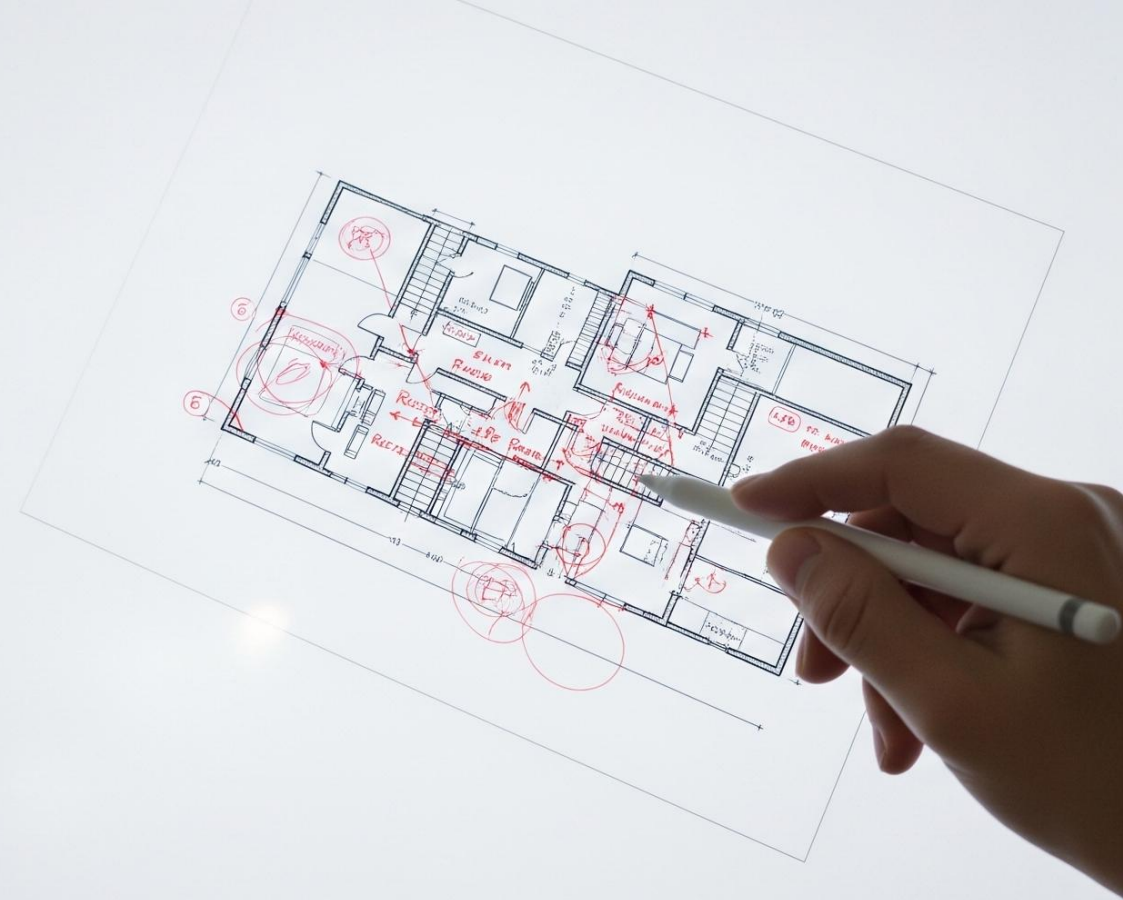

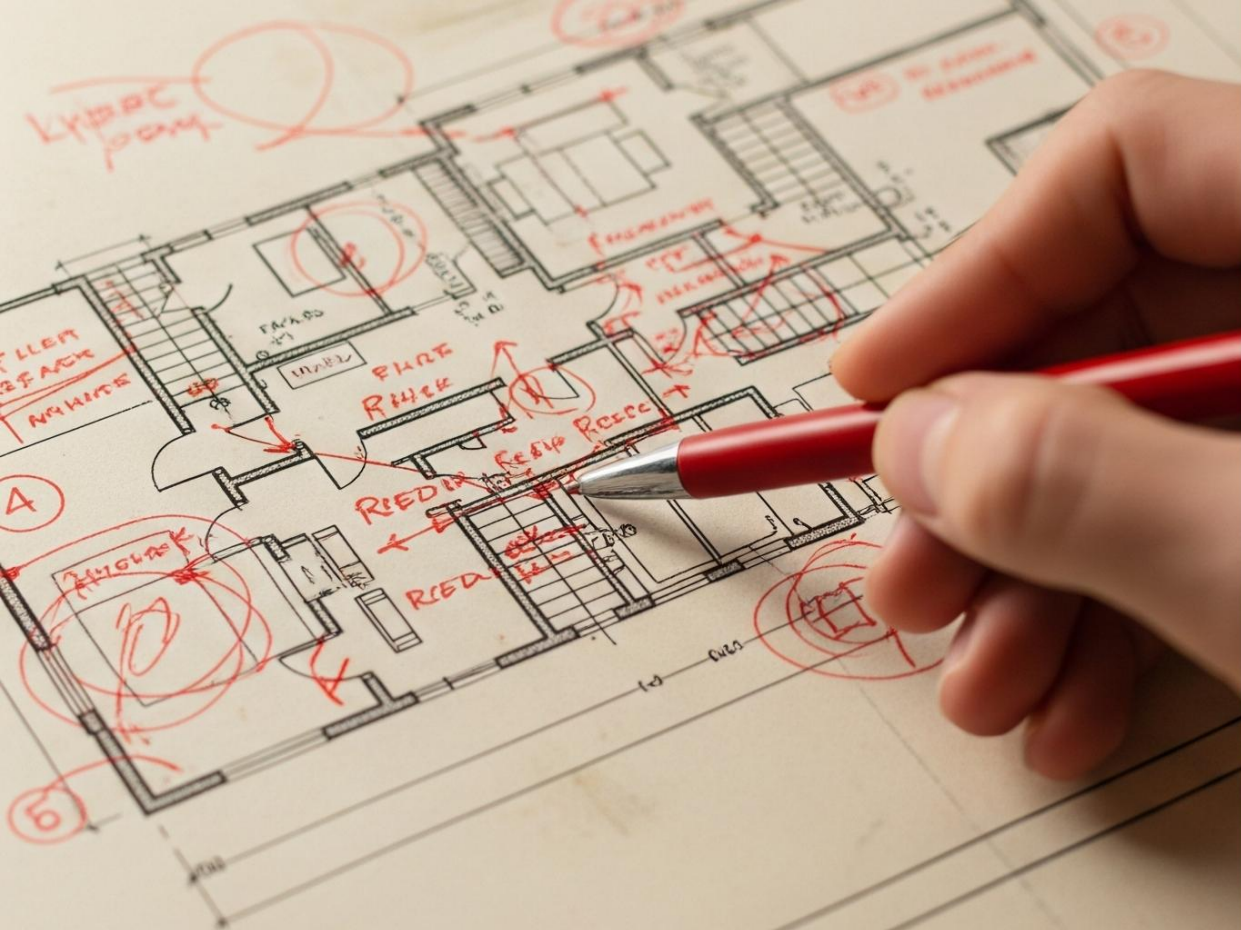

Innovation & Efficiency

We harness advanced technology to provide smart, economical solutions quickly, ensuring our clients benefit from enhanced productivity. Our sophisticated technology and a broad operational reach enable consistently fast project turnarounds. We specialize in solutions for CAD conversion, indexing, and comprehensive document conversion needs.

Our expertise lies in converting your traditional paper drawings into precise, high-quality digital CAD files. We meticulously translate every element to meet your unique CAD requirements or recognized international standards. We proficiently manage various drawing types, such as architectural, engineering, civil, mechanical, MEP, firefighting, and structural designs. Equipped with advanced technical skills, our team can operate across multiple CAD platforms, ensuring smooth compatibility with your current software and systems.

Redline Markups & As-Built Services

Our specialized Redline Markup and As-Built services are designed to ensure the integrity and accuracy of your project documentation. We meticulously convert your hand-drawn or digital redline edits into precise, finalized CAD drawings. This process is crucial for transforming raw design modifications into a clean, comprehensive digital archive that reflects the true, final state of your project.

Enhancing Project Lifecycle Management

By systematically incorporating every change and annotation, we help create an invaluable "as-built" record. This service is not just about updating drawings; it's about providing a critical asset for the entire lifecycle of your project. An accurate digital record is essential for efficient facility management, future maintenance, and seamless renovations. Our process ensures that your documentation remains a reliable and professional reference for years to come.

Scanned Drawing Conversion

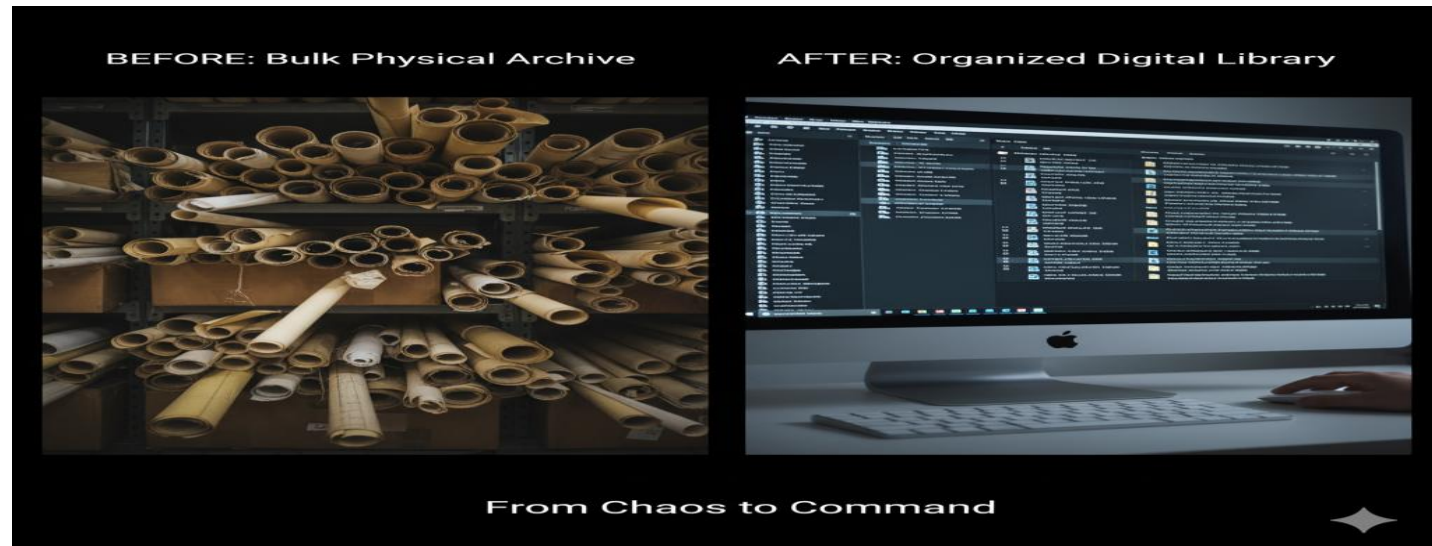

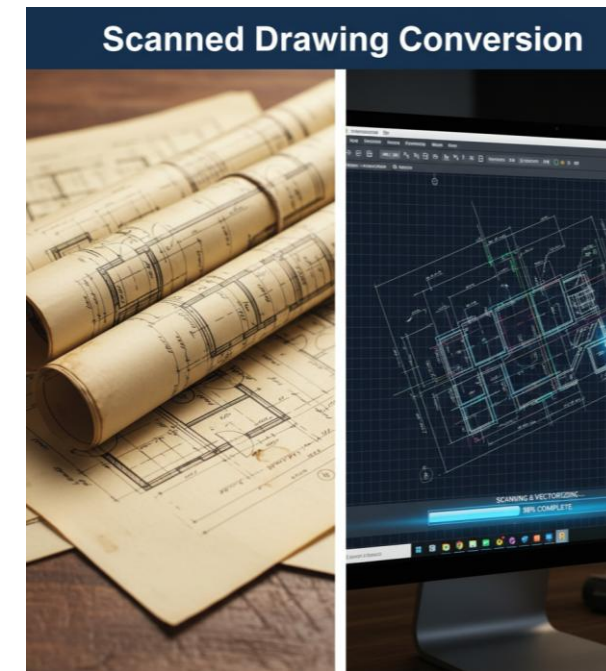

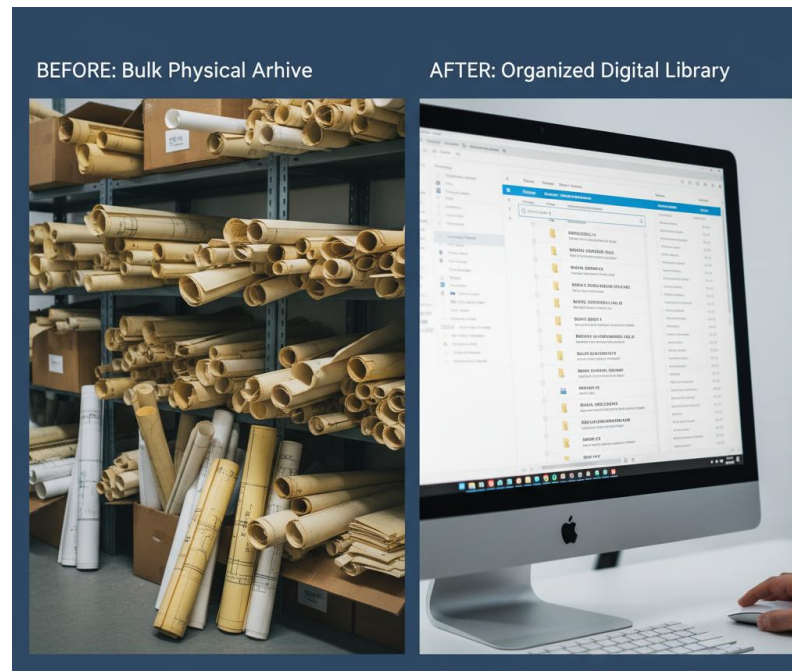

We focus on converting your physical blueprints, sketches, and old paper documents into accurate, editable CAD files. Our advanced conversion techniques guarantee that every important detail from your scanned drawings is faithfully captured in a digital format, making them simpler to manage, edit, and share. This service is vital for preserving and updating historical project records.

Bulk Drawing Conversions

We have the capability to handle large-scale bulk drawing conversions efficiently. Understanding the challenges of digitizing vast archives, we use specialized technology and expertise to complete high-volume projects precisely and on schedule. This service assists organizations in optimizing their documentation workflows, improving access, and minimizing physical storage needs.

Indexing and Renaming Services

In addition to conversion, we offer thorough indexing and renaming services to keep your CAD files well-organized and easy to locate. This includes setting up consistent naming systems, adding metadata tags, and categorizing files, which enhances data management, searchability, and overall efficiency. Our method turns disorganized archives into well-structured and accessible digital collections.

Online Data Entry

Our online data entry services are designed for real-time information input, directly populating web-based systems, CRM platforms, and online databases. This ensures immediate accessibility and up-to-date information for your critical business operations, enhancing efficiency and responsiveness.

Offline Data Entry

We provide reliable offline data entry services for projects that don't require an active internet connection. Our team processes data from various sources, including scanned documents and forms, and then uploads it to your system once a connection is established, offering a flexible and secure solution.

Data Conversion

Our data conversion services transform data from one format to another, ensuring seamless migration and interoperability between different software systems. We handle conversions from various sources, including handwritten documents, images, and legacy files, to a usable digital format, maintaining data integrity and accuracy throughout the process.

Data Processing

Our data processing services cover a wide range of operations, including data cleansing, validation, and analysis. We transform raw data into a structured and valuable asset, ensuring it is accurate, consistent, and ready for effective use in your business intelligence and reporting systems.

+

Document Management

We offer comprehensive document management solutions to help you organize, store, and retrieve your company's documents efficiently. By digitizing your paper documents and implementing a systematic digital framework, we improve accessibility, security, and compliance while reducing physical clutter.

Form Processing

Our form processing services automate the extraction of data from various forms, whether they are physical or digital. We capture information with a high degree of accuracy and transfer it into your databases, significantly accelerating workflows and minimizing manual errors associated with handling large volumes of forms.

Copy-Paste Services

For straightforward data transfer tasks, our copy-paste services offer a fast and reliable solution. We efficiently move data between various documents and applications, such as from spreadsheets to a database or from a PDF to a word processing file, saving you valuable time and resources.

Catalog Data Entry

We provide specialized catalog data entry services to help businesses populate and maintain their product catalogs with precision. This includes entering product details, descriptions, specifications, pricing, and images, ensuring your online or digital catalog is accurate, consistent, and appealing to customers.

E-commerce Product Data Entry

Our dedicated e-commerce product data entry services are tailored for online stores. We meticulously enter and organize all product information, including SKUs, categories, tags, images, and marketing copy, ensuring your online listings are optimized for a smooth customer experience and effective search engine visibility.

E-commerce Upload and Listing

Our e-commerce upload and listing services go beyond simple data entry. We manage the entire process of uploading your product information and creating compelling product listings on various e-commerce platforms like Shopify, Magento, or Amazon, ensuring they are complete, accurate, and optimized for sales.

PDF to Excel Data Entry Services

We specialize in converting data from PDF documents into a structured and analyzable format in Microsoft Excel. This service is critical for financial data, reports, and lists that need to be manipulated, sorted, or used for calculations and charts, unlocking the full potential of your information.

PDF to Word Data Entry Services

Our team provides accurate and efficient data entry services for converting information from PDF documents into an editable Microsoft Word format. This service is ideal for clients who need to modify, edit, or reuse content that is locked within a PDF file.

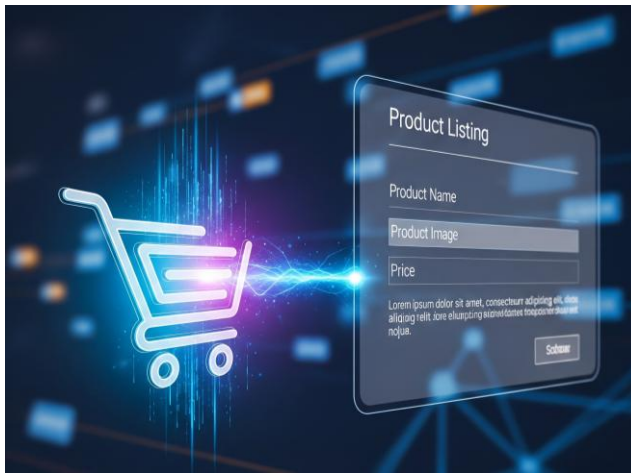

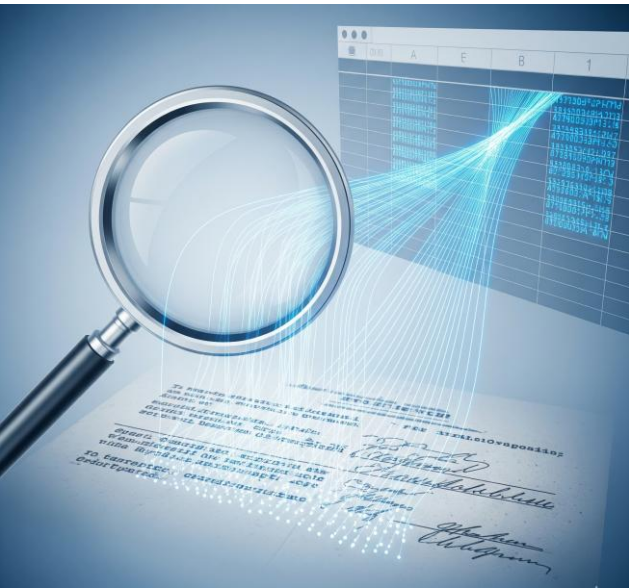

Image Data Entry Services

We specialize in extracting textual and numerical information from images, such as scanned documents, invoices, or business cards. Our service ensures that data from these visual sources is accurately captured and converted into a structured digital format for easy storage and analysis.

Typing Services

Our professional typing services offer a fast and accurate solution for converting various documents into a clean digital format. We handle a wide range of source materials, including handwritten notes, manuscripts, and scanned documents, ensuring a high level of precision and adherence to your specific formatting requirements.

Copy Typing Services

We provide dedicated copy typing services for converting content from one document format to another, meticulously reproducing every detail. This service is ideal for transcribing text from physical books, articles, or reports into a digital file while maintaining the integrity of the original content.

Audio Typing Services

Our audio typing services convert spoken words from audio recordings into written text. This is a valuable service for transcribing interviews, meetings, conferences, or dictations with exceptional accuracy, providing you with a searchable and easily manageable text document.

Book Typing Services

We offer specialized book typing services for authors, publishers, and scholars. Our team meticulously converts book manuscripts—whether handwritten or in a physical format—into digital files, ensuring a precise and formatted output ready for editing, publication, or digital archiving.
